The UAEs home grown First Solution; debt management service company is set to launch in the United States. Making it one of the first home grown brands to make a significant international mark and presence. First Solution has been a leader in providing debt management services to companies for over ...

Public health has moved to the forefront of national interest and scrutiny in the light of present day events. Public health professionals are now regulars in all forms of media, something unheard of just a few years ago. The issues are well known - bioterrorism, SARS, West Nile Virus - and they are enough to panic a population without skillful leadership.

Public Health for the 21st Century: The Prepared Leader examines public health leadership in terms of emergency preparedness and specific skills and tools. As modern-day threats force leaders to look at how they address disasters and drive communities to prepare themselves, this book provides tools and real life cases to hone management skills to prepare agencies to deal with large scale events.

Energy, Ecocriticism, and Nineteenth-Century Fiction: Novel Ecologies draws on energy concepts to revisit some of our favorite books—Mansfield Park, Jane Eyre, Great Expectations, and The War of the Worlds—and the ways these shape our sense of ourselves as ecological beings. Barri J. Gold regards the laws of thermodynamics not solely as a set of physical principles, but also as a cultural and conceptual form that we can use to reimagine our historically vexed relationship to the natural world. Beginning with an examination of the parallel inceptions of energy and ecology in the mid-nineteenth century, this book considers the question of how we may better read and interpret our world, developing a recipe for experimental reading and insisting upon the importance of literary studies in a world driving to ecological catastrophe.

With one famous equation, $E=mc^2$, Einstein proved all matter can be described as energy. It is everywhere and it is everything. In this newly updated and engaging introduction, renowned scientist Vaclav Smil explores energy in all its facets – from the inner workings of the human body to what we eat, the car we drive and the race for more efficient and eco-friendly fuels. Energy: A Beginner's Guide highlights the importance of energy in both past and present societies, by shedding light on the science behind global warming and efforts to prevent it, and by revealing how our daily decisions affect energy consumption. Whether you're looking for dinner table conversation or to further your own understanding, this book will amaze and inform, uncovering the truths and exposing the myths behind one of the most important concepts in our universe.

Howard T. Odum possessed one of the most innovative minds of the twentieth century. He pioneered the fields of ecological engineering, ecological economics, and environmental accounting, working throughout his life to better understand the interrelationships of energy, environment, and society and their importance to the well-being of humanity and the planet. This volume is a major modernization of Odum's classic work on the significance of power and its role in society, bringing his approach and insight to a whole new generation of students and scholars. For this edition Odum refines his original theories and introduces two new measures: emergy and transformity. These concepts can be used to evaluate and compare systems and their transformation and use of resources by accounting for all the energies and materials that flow in and out and expressing them in equivalent ability to do work. Natural energies such as solar radiation and the cycling of water, carbon, nitrogen, and oxygen are diagrammed in terms of energy and emergy flow. Through this method Odum reveals the similarities between human economic and social systems and the ecosystems of the natural world. In the process, we discover that our survival and prosperity are regulated as much by the laws of energetics as are systems of the physical and chemical world.
