Biostatistical Analysis Zar Spearman | www.uppercasing Introductory statistics texts have been noted to have inaccuracies in the tables of critical values for Spearman's correlation. Even the best texts currently available use critical values from the exact distribution only for $N \leq 11$. Zar's table gives critical values for $N \leq 100$ but does not use the most accurate approximation procedure available. This paper provides a table of critical values based on the exact distribution for $3 \leq N \leq 18$ and very accurate critical values for $19 \dots$
