Data Structures in C are used to store data in an organised and efficient manner. The C Programming language has many data structures like an array, stack, queue, linked

# Read Free Data Structures

list, tree, etc.

A programmer selects an appropriate data structure and uses it according to their convenience. Let us look into some of these data structures:  
Array; Stack ;  
Queue

...

A data structure is a group of data elements grouped together under one name.

These data

# Read Free Data Structures

elements, known as members, can have different types and different lengths. Data structures can be declared in C++ using the following syntax:

```
struct  
type_name {  
    member_type1  
    member_name1;  
};
```

# Read Free Data Structures

```
member_type2  
member_name2;  
member_type3  
member_name3;
```
