307 Circuits, the eighth in the 300 series of circuit design books, is a compilation of applications, projects, circuits and tips originally published in the July/August and December issues of Elektor Electronics magazine. This book brings the total of published designs in the 300 series to well over 2300. Books in the 300 series are popular with engineers, students, teachers, hobbyists and other electronics enthusiasts all over the world. Like its predecessors, 307 Circuits offers a galaxy of designs covering the entire field of modern electronics. The book is divided into five sections: Audio and hi-fi; Computers and microprocessors; General interest; Power supplies and battery charges; Radio, television and communications; Test and measurements. Many designs and projects are complemented with a printed circuit board (PCB) layout to aid in their construction. Others are complete with control software which may be ordered from the Publishers.

The book covers Oriental management theories as well as their applications; research on positivism; long-term focus; exclusive interviews and accumulating first-hand data, etc. It also addresses the following topics: Chinese family businesses that have survived for more than one hundred years(e.g. INFINITUS, Beijing TRT); Chinese enterprises and firms that follow the oriental management culture serve as the dynamic engines to the 2nd largest economic entity in the world (e.g., Huawei Technologies Co., Ltd., Mengniu Dairy Gr., Hainan Airlines and so on); Eastern and western managerial cultures that have been growing within Chinese businesses(e.g., Hainan Airlines, INFINITUS); Varied schools such as Confucianism, Taoism, Buddhism, legalism, Military Strategists, Mohist School remain vital but at the same time Chinese businesses and firms welcome and extract the essence of western managerial civilization rather than reject it, etc. These areas will be of particular interest to readers, and the purpose of the book is not only to acquaint the reader with China by providing information about Chinese businesses and firms, but also to provide a royal road to doing business with China as well as allowing them to learn about Chinese managerial wisdom.

This book is intended for those who want to build their own network-connected projects using the Arduino platform. You will be able to build exciting projects that connect to your local network and the Web. You will need to have some basic experience in electronics and web programming languages. You will also need to know the basics of the Arduino platform as the projects mainly deal with the networking aspects of the Arduino Ethernet shield.

The Stranglers have outlasted and outsold virtually every other band of their era, recording ten hit albums and releasing 21 Top 40 singles. Their list of hits, including Golden Brown, were written against a background of spectacular success, dismal failure, drug dependency, financial ruin, infighting and misfortune. As a response to David Buckley's one-sided biography of the band ("No Mercy" Hodder & Stoughton, 1997) and the band's reticence to reveal the true meaning behind their songs, Hugh Cornwell, founding member and songwriter, sets the record straight, displaces the myths and for the first time explains the real stories behind The Stranglers, his departure and the origins of their songs.

Baroque was a rich period in Polish literature, yet it is poorly represented in English translation. This great work, which stands apart from the majority of diaries and memoirs of the period, is one of the most important of Polish literary and historical documents. Although it has never before appeared in print in English, it has been translated into several other languages and has been published in dozens of editions in Polish. Few nations have been more entangled in military, religious, social and political crosscurrents than Poland in the seventeenth century. Pressured from every side in neighboring states, hobbled by a weak central government, it had become a European counter-culture: libertarian, democratic, provincial and hopelessly divided internally. Pasek, a nobleman, soldier, parliamentarian, adventurer, was in the thick of the struggle. Although irascible and a pompous egotist, he was a keen observer and a spirited writer who freely employed a racy, colloquial idiom; his chronicle is filled with whimsy, color, excitement, action and humor. For the political scientist and historian, the Memoirs provides insight into Poland's odd form of egalitarian parliament, and is a rich source of social and military history. Religious scholars will find a new context for the study of the Counter-Reformation and radical Protestantism. And there is much for the student of comparative literature: so well do Pasek's writing fit the romantic idea of a free narration in which one can feel the inflections of a living voice, unhampered by literary conventions, that when the manuscript was discovered in the nineteenth century, scholars at first suspected a forgery. Catherine Leach has translated Pasek with extraordinary clarity and literary power. She also provides extensive annotation, illustrations, map and other reference aids, and a perceptive introductory essay of 45 pages; her work is the product of many years of research and painstaking effort. She has previously published several scholarly papers and translations of many poems, stories, essays and books from Polish and Russian, including Czeslaw Milosz's Native Realm. -- from dust jacket.
