The third edition of Exploring Innovation offers an engaging new perspective on innovation. The book provides business students with a clear understanding of the nature of innovation and how it can be managed and fostered. Written in an accessible style, Exploring Innovation encourages students to challenge their pre-conceived ideas about innovation and to see it as a continuous, on-going process, by exploring some of the biggest developments in innovation. Lively discussions of key concepts are provided through numerous case studies, on a range of original products and services, bringing business theories to life. The new edition has been fully revised and updated with a more intuitive structure to now feature: A greater emphasis on what innovation involves. A new chapter on Value Capture. Expanded coverage on Services and Process Innovations. Two new chapters covering Global and Green trends in innovation. 8 new major case studies and more than 40 new mini-cases including Twitter, Angry Birds, Netflix, Google and Toyota.

Teachers of Chinese as a foreign language in many international contexts are searching for pedagogic solutions to promote effective learning. Models of innovative and successful approaches are urgently needed. This volume presents a collection of compelling and empirically rich research studies that showcases innovative developments in the practice of teaching Chinese as a foreign language. The studies focus on three interrelated areas: learners, teachers, and applications of new technologies. Specifically, the studies explore methods for fostering learner-centred classrooms, autonomous learners, intercultural learning, the role of teacher views and identities, the nature of a 'middle ground' approach, and technologies that accommodate the unique aspects of the Chinese language, with new options for mobile and interactive learners. Providing both inspiration and practical models for language practitioners and researchers, it offers a vital resource for teachers' professional development, and for pre-service teacher education.

Under the guidance of Moeran and Christensen, the authors in this volume examine evaluative practices in the creative industries by exploring the processes surrounding the conception, design, manufacture, appraisal and use of creative goods. They describe the editorial choices made by different participants in a 'creative world', as they go about conceiving, composing or designing, performing or making, selling and assessing a range of cultural products. The study draws upon ethnographically rich case studies from companies as varied as Bang and Olufsen, Hugo Boss and Lonely Planet, in order to reveal the broad range of factors guiding and inhibiting creative processes. Some of these constraints are material and technical; others are social or defined by aesthetic norms. The authors explore how these various constraints affect creative work, and how ultimately they contribute to the development of creativity.

'Birgitte Andersen revisits in a modern context the ideas of Kuznets on technological growth paths, but emphasises the structural variety in patenting where earlier authors focused on aggregate trends. This is an important contribution for scholars interested in the interface between the recent history of technology and evolutionary economics.' - John Cantwell, Rutgers University, US

This book explores the concept of relational care, what it feels like for older people and for carers, why it makes life happier and how those involved in residential or community care can make it work. Relational care is gaining traction as its benefits to individuals and society become recognised. This accessible book, based on real-life models and in-depth interviews, explores fresh ways that relational care can be facilitated in a variety of settings. It looks at practice in terms of team management, support for care workers, technology, design and architecture, intergenerational and multidisciplinary models, and their implications for resilience, wellbeing, policy and future funding. Chapters are arranged by theme and provide descriptions, learning points and resources for each model, as well as incorporating a wealth of interviews giving insights into the lived experience of relational care. This is a lively book full of realistic ideas and information for everyone who wants to find out more about, access or implement the best in care – the best for older people, their families, care workers, management and society.

Innovation principles to bring about meaningful and sustainable growth in your organization Using a list of more than 2,000 successful innovations, including Cirque du Soleil, early IBM mainframes, the Ford Model-T, and many more, the authors applied a proprietary algorithm and determined ten meaningful groupings—the Ten Types of Innovation—that provided insight into innovation. The Ten Types of Innovation explores these insights to diagnose patterns of innovation within industries, to identify innovation opportunities, and to evaluate how firms are performing against competitors. The framework has proven to be one of the most enduring and useful ways to start thinking about transformation. Details how you can use these innovation principles to bring about meaningful—and sustainable—growth within your organization Author Larry Keeley is a world renowned speaker, innovation consultant, and president and co-founder of Doblin, the innovation practice of Monitor Group; BusinessWeek named Keeley one of seven Innovation Gurus who are changing the field The Ten

Read Book Exploring Innovation

Types of Innovation concept has influenced thousands of executives and companies around the world since its discovery in 1998. The Ten Types of Innovation is the first book explaining how to implement it.

This book hopes to stimulate discussion about how entrepreneurship and innovation contribute to growing inequalities in territories. This will help bridge the gap between research and practice on the role of territory dynamics and regional development. The book begins by examining the growing inequality in regions, which has resulted in lagging economic development. The need to shift current economic policy towards spatial inequality through harnessing the innovative capabilities of regions is examined. The book puts forth a case for reversing the inequality that is evident in lagging regions as a way to reinvigorate territories. The book should appeal to researchers, policy makers, business leaders and the general public interested in territorial dynamics and development.
