International Society for Pharmaceutical Engineering (ISPE) sets the guidelines for manufacturers and the current Version is GAMP 5. GAMP describes a set of principles and procedures that help ensure that pharmaceutical Software (Like QMS software, LMS software, DMS software etc.) has required quality.

The purpose of this book is to help you understand how computerized systems are validated using the GAMP5framework. The information will be presented in a project life cycle format. This will give you a solid idea howComputerized System Validation projects are conducted. This book is suited for anyone new to Computer SystemsValidation. It is written in a simple manner and can serve as starter guide which includes many high-level sample templates and illustration.

Thoroughly revised to include the latest industry developments, the Second Edition presents a comprehensive overview of computer validation and verification principles and how to put them into practice. To provide the current best practice and guidance on identifying and implementing improvements for computer systems, the text extensively reviews r

A paddling classic back in print with new maps, photos, details, and afterword. Christine Jerome walked into the Adirondack Museum in Blue Mountain Lake, NY, and promptly fell in love with a 9-foot, 10½-pound canoe named the Sairy Gamp. More than a century before, in 1883, the Sairy Gamp had been paddled and portaged through the Adirondacks by a sixty-one-year-old writer named George Washington Sears (his pen name was Nessmuk). The more Jerome learned about Sears, the more she wanted to follow his route, despite her lack of camping or canoeing experience. In August 1990 she embarked in a 9-foot canoe made of Kevlar and, with her husband, John, accompanying her in a slightly larger boat, set off to retrace Sears's journey. An Adirondack Passage is part social history, part natural history, part biography of Sears, and part chronicle of a voyage. Summer turns to fall while the Jeromes make their way north, through sunshine and storms, down cottage-lined lakes and lonely wild streams. Gusting winds bully their light canoes and by mid-September the days are colder and shorter; but the longer they paddle, the more attached they become to the beauty around them. Canada geese fly overhead, monarch butterflies flutter southward, and on the larger lakes, young loons gather for their first migration to the sea. Along the way the author pauses to tell us what Sears saw when he passed by, and what happened to his favorite haunts in the ensuing century. As the history of the region unfolds we meet hermits and millionaires, hunting guides and society women, hotelkeepers and dime-novel writers, and one lost dancing bear. Christine Jerome has given us a memorable wilderness experience that readers who have never lifted a paddle will find fascinating and invigorating. This new release from Breakaway Books is the third edition, revised and updated with extra photos, maps, and a new afterword. PRAISE FOR AN ADIRONDACK PASSAGE "A fine piece of work and a great delight." —John McPhee "An enchanting record of a canoe trip." —The New Yorker "A writer of fine and watertight prose. . . . An Adirondack Passage is uncategorizable—at once history, naturalism, sociology, and a love story—but unfailingly graceful." —Boston Globe "Personal, witty, and thoughtful—one of the best introductions to the area ever produced." —Audubon "As refreshing a break from the busyness of life as I've come across in awhile." —Newsday "The writing . . . is a constant pleasure. Jerome has a style that suits her subject, quiet and gentle as a paddle in still water. She delivers her lore with wit and whimsy, with fine descriptions and without shrill preaching or righteous posturing." —Smithsonian "The closest thing to a national nonfiction best-seller that the region has seen in ages, and deservedly so." —Adirondack Life "A captivating account. . . . She takes us into a world of hermits and millionaires, of wild streams and glorious mountain scenery." —Publishers Weekly "A delightful tale. . . . An informative, readable adventure whose history and environmental lessons are taught well." —Library Journal

Guiding chromatographers working in regulated industries and helping them to validate their chromatography data systems to meet data integrity, business and regulatory needs. This book is a detailed look at the life cycle and documented evidence required to ensure a system is fit for purpose throughout the lifecycle. Initially providing the regulatory, data integrity and system life cycle requirements for computerised system validation, the book then develops into a guide on planning, specifying, managing risk, configuring and testing a chromatography data system before release. This is followed by operational aspects such as training, integration and IT support and finally retirement. All areas are discussed in detail with case studies and practical examples provided as appropriate. The book has been carefully written and is right up to date including recently released FDA data integrity guidance. It provides detailed guidance on good practice and expands on the first edition making it an invaluable addition to a chromatographer's book shelf.

Standards, technologies, and requirements for computer validation have changed dramatically in recent years, and so have the interpretation of the standards and the understanding of the processes involved. International IT Regulations and Compliance brings together current thinking on the implementation of standards and regulations in relation to IT for a wide variety of industries. The book provides professionals in pharmaceutical and semiconductor industries with an updated overview of requirements for handling IT systems according to various Quality Standards and how to ?translate? these requirements in the regulations.
