Biotransformations in Organic Chemistry: A Textbook: Faber ...

This well-established textbook on biocatalysis provides a

Read Book Kurt Faber Biotransformations In Organic Chemistry

basis for undergraduate and graduate courses in modern organic chemistry, as well as a condensed introduction into this field. After a basic introduction into the use of biocatalysts—principles of stereoselective transformations, enzyme properties and kinetics—the different types of reactions are explained according to the 'reaction principle', such as hydrolysis, reduction, oxidation, C–C bond formation, etc. Special techniques ...
